Hardcover \$17.95 (20pp)

978-1-57687-749-4

*1 Robot Lost His Head* is a very simple book designed to help children ages two to five learn to count to ten. When one robot loses his head, the head is cared for by other robots until it is reunited with its body. Colorful illustrations with lots of white space create images that are amusing and easy to understand, with big bold numerals to focus on. Foldouts on each page will engage young children, allowing them to interact with the book as they learn their numbers.

CATHERINE REED-THURESON (Summer 2016)
