The end notes are particularly helpful to readers who wish to delve into FDIRA (Federal Depository Institutions Regulations Act) and IRS guidelines for background and explanations. Particularly for visual learners sample agreements in the Documentation section of the book can be referred to as readers move through the comprehensive and realistic flow of the chapters.

Gatten makes a strong case for reading the book when he writes “Financial success and real wealth are as different from one another as are owning an airplane and having the ability to fly it.” Any reader wanting to investigate how to achieve real wealth without cash credit or management costs should be sure to have a copy of *A Fortune in Free Real Estate* packed in their flight bag.
