

Bridges and Tunnels: Investigate Feats of Engineering with 25 Projects

Donna Latham

Jen Vaughn, Illustrator

Nomad Press (Jun 1, 2012)

Softcover \$15.95 (128pp)

978-1-936749-51-5

No-holds-barred fun for the kinetic set. A crash-course in the fundamentals of forces and twenty-five experiments to see them in action. How about a marshmallow geodesic dome? Soda-can rocket? Or a demonstration of corrosion? Short discussions on Caisson's disease and bridge collapses complete this engineering primer. Ages nine to twelve.

(Fall 2012)
