(May 1, 2013)

Another stunner from the gifted Julie Morstad. *How To* relays visual instructions on such events as washing your socks (stand in a puddle), watching the wind (fly kites), disappearing (hide behind a curtain), and watching where you're going (track your shadow). A perfect way to elevate familiar children's activities to capture their everyday magic. Innovative cropping of delicate drawings makes them even more precious. Ages four to eight.
